A MESSAGE FROM THE CEO

At Escher Silverman Global, we believe engineering is more than technical design, it's about building solutions that serve people, improve lives, and stand the test of time. Whether it's roads, railways, housing, or city systems, our work reflects a balance of expertise, purpose, and long-term impact.

We approach every project as a partnership, combining global standards with local understanding. Our team brings together financiers, experienced engineers, planners, and managers who are dedicated to practical, forward thinking solutions that meet real-world needs.

What drives us is simple: to deliver results that are reliable, sustainable, and meaningful. Thank you for your trust in us, we look forward to building with you.

DR BERNARD OBIKA

WHO WE ARE

Engineering with Purpose

WHO WE ARE

Our Vision

We envision a world where connectivity, infrastructure and environmental responsibility harmonize to create a prosperous and equitable future.

Our Mission

To drive change through infrastructure excellence. We view every project as an opportunity to make a positive impact on society, economy and environment, by combining technical mastery with a deep commitment to social responsibility.

About Us

Escher Silverman Global (ESG) is a dynamic and experienced civil engineering consulting firm, with an outstanding track record of projects in the transport infrastructure sector.

Founded in the UK over 30 years ago, ESG currently operates from its offices in Nigeria and in UK. We have established partnerships with esteemed consulting firms in various regions across Africa, Europe and Asia. This Extensive network allows to bring diverse perspectives, local insights, and a wealth of international experiences to every project we undertake.

As we look to the future, ESG is committed to building capacity and empowering infrastructure delivery across Africa through inspired, transformative engineering solutions.

LEADERSHIP

Dr Bernard Obika PhD MSc MBIE FGS

Lead consultant
Over 40 years' experience in over 30 countries with major international organisations.

Engr. Ike Egbuna

Chief Operating Officer
Expertise in highway and structural design, and construction spanning West Africa, East & South Africa and America.

Dr. Emmanuel Onwodi FCILT, FCA

Director, Business Development
Specialising on Infrastructure, logistic and transportation, , finance , PPP and risk management.

Engr. Theophilus Inufin

Civil/ Highway Engineer
Real estate development, Highway, design, construction, traffic studies and project management.

Engr. John Okwudiafo

Highway, Bridges and Water Engineer
Experience in infrastructure development across Africa, Europe & Asia

Wale Badmus

Quantity Surveyor/Contract expert
Expertise in construction management, cost control and quality assurance

Michael Kagwa

Project Finance and Investment Banker
25+ years experience, focusing on frontier and emerging markets in Sub Saharan Africa

Michael Gleeson

Commercial Law and Litigation
Islamic finance, corporate law, contracts.

OUR PROFESSIONALS

Dedicated experts delivering exceptional results through continuous development, advanced technology, and industry best practices ensuring sustainable, cost effective, and high quality outcomes.

OUR SERVICES

We provide high value engineering consultancy services across the full project lifecycle from initial concept and feasibility to design, implementation, and operations. Our work is grounded in global best practices, tailored to local contexts, and executed using modern tools and technology.

GROWTH & SUCCESS

Enduring track record of success

PATHWAY TO PROGRESS

Growing through impact, building across borders

2019-2022

Expanding Trust, Building Influence

Formed strategic alliances across Africa and Europe while delivering high impact advisory in transport, climate change and urban development. Trust earned from early engagements evolved into long-term partnerships, positioning us as a consulting partner of choice on complex, multidisciplinary projects.

2018

Early Growth & International Expansion

Delivered our first major infrastructure project in Southern Nigeria and expanded operations to Abuja, Enugu and Benin, and initiated international presence in Botswana and the UK.

2022-2025

Consolidating Urban Development

Implemented ISO certified systems to enhance quality assurance, clients satisfaction, and internal process efficiency. Reinforced our commitment to delivering reliable, future focused engineering solutions.

SHARED SUCCESS

At Escher Silverman Global, we strive to push the limits of engineering innovation with every project, drawing on our success across various sectors. Our success is measured by the success of our clients.

2018-2019

Major PPP Projects Initiated

Provided end to end advisory services on KADPoly, EEDC, and Enugu -Port Harcourt Highway and several other PPP transaction advisory projects covering surveys, risk analysis, design, and financial modelling.

2019

Trusted Advisory

Strengthened our role as the go to consultancy in Nigeria for PPP transaction advisory on road and rail infrastructure, integrating digital tools and tailored engineering solutions.

2004-2018

UK Operations

Focussed on providing services to the UK residential and commercial development sector.

OUR LASTING FOOTPRINT IN INFRASTRUCTURE

We are proud of the tangible impact we have made financing, designing resilient infrastructure, supporting local communities, and driving sustainability through every stage of the process.

OUR PROJECTS

A selection of our infrastructure
solutions

ROAD & HIGHWAY

STRIVING FOR TRANSPORT SYSTEMS THAT
ARE ACCESSIBLE, AFFORDABLE, EFFICIENT,
GREEN AND INCLUSIVE

Highway Design and

Environmental Impact
Assessments (EIA)

ROAD & HIGHWAY

Senior ESG employees have led the UK-funded Global High Volume Transport Applied Research Programme, A major global flagship transport research programme that amongst others included:

- Collaborating with PIARC and the (World Bank Association) and World Bank to update and remodel the Highway economic appraisal tool-**HDM4**, used Worldwide to assess project economics.
- Revision of **Road Note 31** for the Design of Roads in Tropical areas to accommodate climate change and new evidence on materials technology and drainage worldwide.
- Development of decision support tool for the assessment of **climate impact on transport infrastructure** in low income countries, collaboration with oxford university, Southampton University, UK and worldwide.
- Development of climate resilient road surfacing materials in collaboration with University of Birmingham, UK and worldwide.

KEY PROJECTS

Modernalisation and upgrade of the Lagos-Ibadan Expressway

Transaction Advisory

Edo State Ministry of Infrastructure: Road design standards, specifications, and quality assurance for transport systems

Lead Technical Assistance

Design and bidding documents for Edo roads using Geo-Nano technology to extend pavement life and reduce costs, funded by Federal and State Government

Sole Engineering Consultant

Detailed design and construction supervision of the 17km internal arterial road and the 22 km four-lane boundary road of the Enyimba Economic City

Transaction Advisory

Design, and Supervision Consultancy for the development of the Enugu Transport Hub

Sole Engineering Consultant

Construction of the 2nd Niger bridge linking Anambra and Delta states through a concession under the Public Private Partnership (PPP)

Transaction Advisory

KEY PROJECTS

Detailed Engineering Design for the Rehabilitation of Benin – Asaba Highway under HDMI Phase 1

Sole Engineering Consultant

Detailed Engineering Design for the Rehabilitation of Lagos- Ota – Abeokuta Highway under HDMI Phase 1

Sole Engineering Consultant

Transaction Advisory on the Enugu-Onitsha Road Development Rehabilitation

Transaction Advisory

Detailed Engineering Design for the Rehabilitation of Enugu Port Harcourt Highway under HDMI

Sole Engineering Consultant

Project Management Consultancy of the construction of St. Saviour Road, Edo State

Sole Engineering Consultant

Edo State Accelerated Road Development Program Phase 1

Sole Engineering Consultant

Edo State Accelerated Road Development Program Phase 2

Sole Engineering Consultant

Detailed Engineering Design for the Rehabilitation of Onitsha-Owerri-Aba Road Highway under HDMI Phase 1

Sole Engineering Consultant

Construction and dualisation of the Owo/Ubahu/Ama Nkanu/Neke Ikem Road Enugu State

Sole Engineering Consultant

Supervision services on the construction of the Amechi Idodo Amagunze Road in Enugu State

Federal Committee for Unbundling of the National Rail Corporation

Institutional Advisory

WATER

VALUING SUSTAINABILITY AND QUALITY OF PROVISION

Water Supply and Distribution Systems

Wastewater Treatment and Management

Water Resource Management

Water Quality Monitoring and Analysis

Flood Risk and Drainage Management

Desalination and Water Treatment Technologies

WATER

We focus on improving water access, treatment and long-term resource security in the areas we serve. Our work looks closely at water quality, ecosystem protection and how each intervention supports natural balance. We design systems that strengthen distribution, reduce losses and improve overall performance. Every project is planned to withstand floods, droughts and other water-related risks. We also work with communities to ensure the solutions we deliver support a reliable and healthy water supply over time.

KEY PROJECTS

Design Review of water supply and sewerage systems for Enugu New City

Project Management

Enyimba Economic City preliminary design of water supply and sewerage treatment systems

Project Closure and Evaluation

PROJECT MANAGEMENT

We provide end-to-end project management services that ensure timely, cost-effective, and high-quality delivery. With careful planning and expert oversight, we manage risks, resources, and schedules to achieve successful, sustainable outcomes.

KEY PROJECTS

DBFOT Development of FESTAC Phase 2 Internal Roads and Mile Two–Badagry–Airport Bypass

Technical Project Management

Development of Enugu–Port Harcourt Expressway and Onne–Obinze Greenfield Road

Contractual & Project Management

Consultant to the Enugu State Government for the Development of the New Enugu City

In Partnership with CEG UK LTD

Project Management, Design, and Supervision Consultancy for the development of the Enugu Transport Hubs

Sole Engineering Consultant

Development of Design, Build, Finance, Operate, and Transfer (DBFOT) of the Benin to Ekpoma Highway in Edo State

Contractual & Project Management

Development and analysis of EECDC Logistic Hub in partnership with Royal Haskoning

Contractual & Project Management

PPP TRANSACTION

COLLABORATIVE INVESTMENT OPPORTUNITIES

Feasibility Studies and Project Structuring

PPP Legal and Regulatory Advisory

Financial Planning and Investment Structuring

Procurement and Tendering Process Management

Contract Management and Project Monitoring

Stakeholder Engagement and Public Communication

PPP TRANSACTION

We facilitate PPPs that deliver vital infrastructure and services while creating value for communities. Our role ensures that every project is well-structured, compliant, and impactful.

KEY PROJECTS

PPP Transaction Advisory Services for KADPOLY Infrastructure Development funded by Private Finance

Transaction Adviser

HDMI PPP Transactions Traffic Studies & Revenue Forecasts for Benin–Asaba Highway

Joint Ventures with Peter Davidson Consultancy

Project Monitoring & Evaluation for River Jamieson SPV Ltd NGN24.5Bn Bond 1

Sole Engineering Consultant and Transaction Adviser

Enugu–Port Harcourt Expressway and Onne–Obinze Greenfield Road (Private Equity Funded)

Lead Consultant Transaction Adviser

Nigerian HDMI PPP Transactions, Traffic Studies and Modelling demand and revenue forecasts for Enyimba Economic City

Lead Consultant Transaction Adviser

Development of the resettlement action plan for the Rehabilitation Of Lagos–Ota Abeokuta Highway under HDMI funding Private Equity

Sole Engineering Consultant Transaction Adviser

PPP infrastructure for the London Heathrow Southern link rail project

Transaction Adviser

KEY PROJECTS

Development of Onitsha-Owerri-
Aba Highway under Federal
Government HDMI

Lead Technical Assistance

PPP DBOT Development of Benin-
Ekpoma Highway, Edo State (Private
Equity & DBSA Funded)

Development of Enugu to Port-
Harcourt Highway under the
Federal Government under HDMI
Project

Sole Engineering Consultant

OUR IMPACT

Values, vision, and a team united
as one

WHAT DRIVES US

Our Employees

We believe great engineering starts with great people. Our employees are more than team members, they are partners in progress. We cultivate a workplace that encourages curiosity, professional growth, and shared purpose, ensuring our collective success is built on their passion and expertise.

Our Clients

Our goal is to simplify the decision-making process for our clients, ensuring that the project meets its scope, performance, schedule, budget, and all other specified or implied requirements. We strive to build strong, trusting relationships with our clients, delivering results that encourage them to return to us for future project needs.

Society

As a team, both management and staff, we are deeply connected to the communities we serve. Our projects are driven by a commitment to improve the areas where we work, pushing us to continually enhance our performance. We conduct thorough stakeholder consultations during the planning stages of each project, ensuring our proposals address the root causes of issues. Our aim is to drive positive change within society through our work. We take pride in revisiting completed projects and witnessing the satisfaction of the communities. Understanding the public's expectations for responsible and transparent use of resources, we hold ourselves accountable for our actions and decisions.

Economy

Efficiently planned and executed infrastructure fosters economic growth. While costly solutions are easy, we focus on delivering cost-effective ones. Our planning, engineering, and project management ensure economic viability throughout construction, operation, and maintenance. Quality, cost-efficiency, and timely delivery are our priorities, with in-depth analysis of alternatives to find the best solutions. We also strive to innovate continuously, leveraging the latest technologies and methodologies to enhance project outcomes and provide long-term value to our clients and communities.

Planning

Focused on strategy

Construction

Building with precision

Operation

Efficiently driving progress

Environment

We are committed to providing sustainable planning solutions through the use of affordable technologies. Our approach involves carefully selecting materials and methods that prioritize environmental protection. We take responsibility in delivering projects that align with nature, conserve natural resources, and safeguard ecosystems. Through ecologically sound planning and design techniques, we address land-use conflicts and environmental pollution, ensuring our projects respect both the environment and forest regulations.

Protect

Preserving nature's balance

Conserve

Safeguarding resources sustainably

Harmony

Fostering environmental balance

IMPACT BEYOND ENGINEERING

OUR COMMITMENT TO PEOPLE AND PLANET

- Supporting access to quality education through infrastructure, learning materials, and technical exposure in underserved communities.
- We engineer progress not just in infrastructure, out in lives. Every act of service moves the world.

Our Social Impact Initiative

Empowering Engineers

Providing hands on training, upskilling, and technical exposure for engineers

Workforce Upskilling

Equipping professionals with modern tools and methodologies for today's engineering demands

STEM for All

Offering basic tech and engineering lessons to school children

Sustainable Waste Infrastructure

Designing systems that support long-term waste management and environmental health

A WORKPLACE FOR EVERYONE

Where Individual Strengths Spark Collective Growth...

We are committed to fostering a diverse and inclusive environment where every engineering mind contributes to innovative, sustainable, and client-focused solutions.
